

# Efficient Beef Updates 2024

Wednesday, 27 November  
9.30am - 4.30pm  
JP Belshaw Lecture Theatre, University of  
New England, Armidale NSW

Learn about the latest collaborative research developments in efficient beef production. Topics will include:

- the current state of global efficient beef research
- mature cow traits and efficiency
- methane and link to efficiency
- challenges of recording methane
- genetic evaluation analysis of methane in Southern Multi Breed and Angus Sire Benchmarking Program herds
- initial insights into Southern Multi Breed analysis
- Meat by Environment – BBQ masterclass with Masterchef McGilchrist

The day also includes a field trip to Tullimba Feedlot (bus provided) to view Southern Multi Breed and Angus Sire Benchmarking Program steers.
